

Lundi 17 Mai 2021

---

Horaires	Participants
12h45 – 12h50	<b>Galatée Courbet</b> <i>Characterization of the ionic signatures of plants submitted to nutritional deficiencies and some potentially involved mechanism</i>
12h50 – 12h55	<b>Emmanuel Laillet de Montullé</b> <i>Chemoattraction of glioma cells in a local hydrogel trap and immune control associated with improved survival and cognitive functions in a mouse model of glioblastoma resection</i>
12h55 – 13h00	<b>Manon Peyrafort</b> <i>Emotional responses to positive and negative feeding experience in the common cuttlefish (<i>Sepia officinalis</i>)</i>
13h00 – 13h05	<b>Déborah Groussard</b> <i>Endothelial deficiency in <i>Pkd1</i> impairs the development of arterio-venous fistula</i>
13h05 – 13h10	<b>Kelly Poitou</b> <i>Evaluation of plasticizers from protective gloves: determination of the content of plasticizers in vinyl gloves and in vitro toxicity studies on microvascular endothelial cells</i>
13h10 – 13h15	<b>Fatima-Azzahra Dwiri</b> <i>Impact of targeted irradiation on the healthy brain tissue and cognition: longitudinal and multiparametric study in the rat</i>
13h15 – 13h20	<b>Lou Legouez</b> <i>Sex- and time-dependent preventive effects of magnesium sulfate and a butyrate in a neonatal mouse model of hypoxic-ischemic insult</i>
13h20 – 13h25	<b>Lethicia Magno Massuia De Almeida</b> <i>High temperature patterns determine seed yield and quality in oilseed rape in the context of climate change</i>
13h25 – 13h30	<b>Thi Ngoc Hanh Nguyen</b> <i>Molecular characterization of the Root Extracellular Trap (RET) in ryegrass (<i>Lolium perenne</i>), a fructan-producing plant</i>

Mardi 18 Mai 2021

---

Horaires	Participants
14h30 – 14h35	<b>Inès Drissa</b> <i>Deciphering the role of miRNA in the control of catecholamines secretion by pheochromocytomas</i>
14h35 – 14h40	<b>Antoine Géry</b> <i>Viability assay of A549 and HaCaT cells after direct exposure to spores and ethyl acetate extracts of <i>Aspergilli</i> of the <i>Versicolores</i> section</i>
14h40 – 14h45	<b>Quentin Lemerrier</b> <i>Ex vivo and in vivo approaches to study the dynamics of glioma cell invasion within the white matter</i>
14h45 – 14h50	<b>Cécilia Thomine</b> <i>Interest of HDAC inhibitor belinostat, in monotherapy or in association with Bcl-xL or Mcl-1 inhibitors, in ovarian cancer treatment</i>
14h50 – 14h55	<b>Mohamed Kante</b> <i>Legumes carbon and nitrogen rhizodeposition: study of their variability and influence on soil enzymes activities</i>
14h55 – 15h00	<b>Cédric Jehan</b> <i>Role of the endoplasmic reticulum-resident selenoprotein T in POMC neurons from the arcuate nucleus</i>
15h00 – 15h05	<b>Carine El Hajjar</b> <i>The biological effects of long-term repeated exposure of monocyte-derived macrophages cells (MDM) and human bronchial epithelial cells (NHBE) to indoor airborne particles in vitro</i>
15h05 – 15h10	<b>Alexandre Levallois</b> <i>Effects of chronic exposure to metals from the dissolution of a galvanic aluminium anode in the Pacific oyster <i>Crassostrea gigas</i></i>
