

Lundi 17 Mai 2021

Horaires	Participants
16h30 – 16h35	Vincent Camus <i>Multiparametric characterization of primary mediastinal large B-cell lymphoma</i>
16h35 – 16h40	Mélanie Fortier <i>Pisum sativum root development under water deficit: involvement of Root Extracellular Trap (RET) and exudates?</i>
16h40 – 16h45	Caroline Lahogue <i>Treatment strategy targeting 5-HT6R in an innovative animal model of schizophrenia</i>
16h45 – 16h50	Lucie Martin <i>Physical constraints during chemotactic migration of glioma: nuclear alterations and potential genetic instability</i>
16h50 – 16h55	Alexia Gaudry <i>Root immunity: the role of root cap and its secretions in plant protection</i>
16h55 – 17h00	Rima Salma <i>Studies of biological pathways involved in radioresistant of cancer stem cells after hadron irradiation</i>

Mardi 18 Mai 2021

Horaires	Participants
09h00 – 09h05	Emma Vidal <i>Cartilage engineering using vegetal biomaterials</i>
09h05 – 09h10	Lucie Prevost <i>Functional interaction between Angiotensin II type 1 receptor (AT1) and Urotensin II receptor (UT)</i>
09h10 – 09h15	Marie Deschler <i>NEMESIS: Interactions and chemical communication between toxic diatoms Pseudo-nitzschia and primary consumers (Copepods)</i>
09h15 – 09h20	Laura Moutard <i>Steroidogenesis and androgen/estrogen signalling pathways in in vitro matured testicular tissues of prepubertal mice</i>
09h20 – 09h25	Céleste Nicola <i>Impact of cancer and check-point inhibitors immunotherapies on emotional reactivity and cognitive functions in mice</i>
09h25 – 09h30	Giulia Binarelli <i>Computerized intervention for the improvement of cognitive difficulties in women treated for breast cancer: implementation, follow-up and evaluation of the Cog-Stim research program</i>
